At American Standard Heating & Air Conditioning, we strive to deliver the comfort you and your family expect. No matter if it's our top notch Platinum Series, the reliably efficient Gold Series, or the hardworking and durable Silver Series, rest assured knowing you'll get the same commitment to high quality craftsmanship from every air conditioner that bears the American Standard name. After all, you can't have a higher standard of comfort without first having a higher standard of quality.

SEER and savings.

When comparing air conditioners, pay close attention to the SEER, or Seasonal Energy Efficiency Ratio. It's a measure of how efficiently an air conditioner cools your home in the summer. Similar to miles per gallon in a car, the higher the SEER, the less energy you'll use to stay comfortable.

RELIABILITY, THROUGH AND THROUGH.

American Standard air conditioners aren't just built to be comfortable and efficient, they're also built to last. From our high quality materials and innovative features to our durable construction, each air conditioner we make is designed to give you long lasting comfort, reliability and efficiency. Just check out the Platinum ZM below. You can also use our comparison chart on the next page to find the American Standard product that's right for you.

- 1 AccuLink™ control board**
Enables the unit to communicate system information to your Comfort Control and technician during installation and maintenance.*
- 2 All-aluminum Spine Fin™ coil**
An exclusive design makes it extremely efficient at transferring heat, and highly resistant to corrosion.
- 3 Dual Duration™ compressors**
A dual-compressor design that gives you both comfort and efficiency, with the first compressor providing reliable, daily comfort, and a second that delivers extra cooling on the hottest of days.
- 4 Charge Assist™ charging port**
Helps your technician perform an accurate charge during installation, for enhanced efficiency and longer system life.
- 5 Variable-speed fan motor**
Adjusts speed based on cooling requirements for higher efficiency and quieter operation.
- 6 Heavy-duty steel louvered panels**
Protect the coil from dirt and damage while still providing substantial airflow.
- 7 Appliance-grade finish**
Durable powder-paint finish resists rust and scratches, eliminates sharp edges and provides years of lasting protection.

Platinum ZM

- 8 Durabase™ basepan**
Built to resist cracks, rust and corrosion.
- 9 SermaGuard™ rust-resistant screws**
Tested in salt spray and proven to withstand the damaging effects of ultraviolet light, they prevent rust and streaks from marring the finish and keep your system looking good.
- 10 Compressor sound insulators**
Reduce operating noise for quiet comfort.

Features and components may vary by model and are shown for illustration purposes only.

*An American Standard Gold ZM Control is required for all Platinum ZM air conditioners.

Many of our air conditioners are ENERGY STAR® Qualified. Ask your dealer for details.

The ENERGY STAR program is a joint effort between the U.S. Environmental Protection Agency and the U.S. Department of Energy designed to help consumers identify energy-efficient products. When you see the ENERGY STAR symbol, you know your air conditioner will help reduce your energy consumption and help the whole planet stay comfortable.

American Standard Comfort Controls.

Temperature control is only the beginning. Bright, intuitive American Standard controls can do everything from controlling humidity levels to displaying digital photos to providing live weather radar and forecasts.

PERFECTLY BALANCED, PERFECTLY COMFORTABLE.

In a matched system, everything works together for your comfort.

A matched system from American Standard Heating & Air Conditioning is a system that combines components that have been designed to work with one another. The result is a perfectly balanced system tuned for efficiency and substantial comfort, producing air unlike anything you've felt before.

1

Air Conditioner

Best for warmer climates, it works with your indoor unit to keep your home cool.

2

Comfort Control

With programmable or non-programmable options available, American Standard controls are smart, clear and intuitive.

3

Furnace

Warms your home with oil or natural gas during the winter, while circulating cooled air in the summer.

4

AccuClean™

A new definition of whole-home air filtration, AccuClean removes up to an incredible 99.98% of particles down to .1 micron from the filtered air.

OR

Air Handler

Circulates heated or cooled air throughout your home quietly and efficiently.

5

Coils

Attached to your furnace or within your air handler, it works with your outdoor unit to provide air that is cool, comfortable and conditioned.

Staged compressors keep temperatures consistent.

For extra efficiency and comfort, many American Standard air conditioners offer multi-stage cooling. This not only helps your air conditioner operate at more efficient speeds most of the time, it also provides more steady, even comfort during extreme temperature demands.

Air Conditioners with multi-stage compressors can keep the temperature in your home steady even during extremely hot or cool days.

AccuClean™ works harder so you can breath easier.

Want 99.98% clean air? Then choose the home air filtration system that gives 110% – American Standard's revolutionary AccuClean.™ By removing up to 99.98% of unwanted allergens down to .1 micron from the filtered air, AccuClean is 100 times more effective than a standard 1" throwaway filter. Simply put, AccuClean works harder, so you and your family can breath easier.

Ionic-Type Room Appliance	1" Throwaway Filter	Typical Room HEPA Appliance	Whole-Home 5" Media Filter	Whole-Home Electronic Filter	Whole-Home AccuClean
10	12	150	240	660	1200

Ratings of cubic feet per minute of clean air delivered for a typical 3-ton heating and cooling system: the higher the value, the more effective the air cleaner.

Clean air delivery rate (efficiency times airflow rate) is recognized by the Federal Trade Commission (FTC) and Environmental Protection Agency (EPA) as a fair and objective measure of various air cleaner technologies.
